1. Login Screen

This screen allows existing users to log in using their email and password. It also provides options for password recovery and login via Google or Facebook. A “Sign Up” link is available for new users.

1. Login Screen

This screen allows existing users to log in using their email and password. It also provides options for password recovery and login via Google or Facebook. A “Sign Up” link is available for new users.

The login screen features a light green background. At the top, there is a red heart icon inside a light blue circle. Below this, the text "Welcome Back" is displayed in bold, followed by "Sign in to continue to Wellness Guide" in a smaller font. The login form is a white rounded rectangle containing an "Email" field with the placeholder "Enter your email", a "Password" field with the placeholder "Enter your password", and a "Forgot Password?" link. A dark teal "Log In" button is positioned below the password field. Underneath the button is the text "OR". Below "OR" is a white button with the text "Continue with Google". At the bottom of the form is a link that reads "Don't have an account? Sign Up". An arrow points from this link to the registration screen on the right. The screen also shows a status bar at the top with the time "10:45" and battery level "67%", and an Android navigation bar at the bottom.

2. Registration Screen

This screen allows new users to create an account by entering their personal details. Users can sign up or switch to the login screen if they already have an account.

The registration screen has a light green background. At the top, the text "Create Account" is in bold, followed by "Start your wellness journey" in a smaller font. The registration form is a white rounded rectangle containing four input fields: "Full name", "Email", "Password", and "Confirm password". A dark teal "Sign Up" button is located below these fields. At the bottom of the form is a link that reads "Already have an account? Log In".

1. Home Dashboard (Overview Screen)
This screen displays the user's wellness status, quick actions, and recent activities. It allows users to monitor their health and access features like logging symptoms and starting sleep tracking.

2. Health Check & Activity Screen

This screen allows users to check symptoms (headache, fever, cough) and view daily activity progress. It also provides access to saved sleep data and assessment history.

Fever Assessment

Choose your temperature range so we can give safer wellness guidance.

Temperature range

Low-grade fever

37.0°C - 37.5°C

Moderate fever

37.6°C - 38.5°C

High fever

38.6°C+

Low-grade fever

Mild temperature increase.

Recommendation: Rest, drink water, monitor condition.

Common Symptoms

Chills or sweating

Body aches

Weakness or fatigue

Headache

Loss of appetite

Dehydration

Note: This is not a medical diagnosis. Seek medical attention if fever persists or worsens.

Cough Assessment

Select the cough type that best matches what you feel.

Cough type

Dry Cough

No mucus or phlegm

Wet Cough

Produces mucus or phlegm

Persistent Cough

Lasting more than 3 weeks

Wet cough with mucus may be related to congestion or respiratory irritation.

Recommendation: Stay hydrated, rest, and monitor if fever or chest discomfort appears.

Common Triggers

Smoke or pollution

Dust or allergens

Cold air

Strong odors

Post-nasal drip

Helpful Tips

Drink warm liquids

Use a humidifier

Avoid smoke and dust

Stay hydrated

Rest your voice

Note: This is not a medical diagnosis. Consult a healthcare professional if symptoms persist or worsen.

1. Navigation Menu (Sidebar)
This screen shows the side menu, allowing users to navigate to different sections such as Home, Profile, Assessments, and Wellness features.

2. Profile Screen (Personal Information)
This screen allows users to view and edit their personal wellness information, including age, gender, height, weight, and emergency contact details.

3. Profile Screen (Additional Details)
This screen includes fields for emergency contact, wellness notes, and account-related information. Users can save their profile after updating the details.

**1. Health Background Screen
(Conditions & Allergies)**
This screen allows users to input their existing medical conditions and allergies to help personalize wellness guidance.

**2. Health Background Screen
(Risk & Notes)**
This screen allows users to add medical notes, select risk factors, and save their health background information.

Health Background

Save conditions, allergies, medications, and risk factors that may affect wellness guidance.

Existing Conditions

Asthma

Diabetes

Hypertension

Migraine

Heart Condition

None

Allergies

Food Allergy

Dust Allergy

Pollen Allergy

Example: Paracetamol, inhaler, vitamins

Medical Notes

Previous surgery, special notes, or important health background

Risk Background

Smoker

Pregnant

Senior Citizen

Immunocompromised

None

Purpose

Health background helps the app understand possible risk factors during wellness checks. Example: asthma plus breathing difficulty may need more caution.

Save & Continue to Mental Wellness

1. Mental Wellness Screen (Emotional Status)
This screen allows users to select their current emotions and stress level.

2. Mental Wellness Screen (Mood Factors & Action)
This screen allows users to identify factors affecting their mood, try a breathing exercise, and continue to the next step.

1. Sleep Tracker Screen (Sleep Input)
This screen allows users to enter their sleep time, wake time, and rate their sleep quality.

2. Sleep Tracker Screen (Sleep Details & Save)
This screen allows users to provide additional sleep details and save to view their assessment results.

1. Assessment History Screen
This screen displays saved assessments, wellness logs, and results. It also shows a status guide and detailed past activity records.

1. Latest Result Screen
This screen displays the user's most recent wellness assessment, including status, symptoms, and personalized recommendations.

1. Recovery Plan Screen
This screen shows recommended actions after an assessment to help users maintain or improve their wellness.

1. Health Summary Screen
This screen provides an overview of the user's recent wellness logs, activities, and overall status.

Adeline Palmerstone

1. Download Report Screen (Filter Selection)

This screen allows users to choose a date filter or custom range for generating a wellness report.

2. Download Report Screen (Preview & Generate)

This screen shows a preview of the report details and allows users to generate a PDF report.

1. Daily Check-In Screen (Input Section)
This screen allows users to select their mood and energy level for the day.

2. Daily Check-In Screen (Details & History)
This screen allows users to log symptoms, add notes, save their check-in, and view recent entries.

1. Sleep Log Screen
This screen displays saved sleep records and recommendations, and allows users to add a new sleep log.

1. Mood & Stress Screen
This screen displays saved mood and stress logs, and allows users to add a new mood check.

1. Physical Activity Screen (Overview)

This screen displays the user's daily movement, steps, and activity progress.

2. Physical Activity Screen (Actions & Weekly Data)

This screen allows users to set goals, track activities, and view weekly progress.

1. Reminders Screen (Overview)
This screen allows users to manage and turn on wellness reminders.

2. Reminders Screen (Reminder Options)
This screen displays different reminder types that users can enable or disable.

1. Warning Signs Screen (Overview)
This screen provides important warning signs and general health safety information.

2. Warning Signs Screen (Detailed Alerts)
This screen lists specific symptoms and explains when medical attention may be needed.

1. Disclaimer Screen

This screen provides important information about the app's purpose, limitations, and medical disclaimer.

1. Settings Screen (Account & Profile)

This screen displays user account details and allows profile picture customization.

2. Settings Screen (Security & Actions)

This screen allows users to manage biometric login, change password, and log out of the account.
